

Herb Rejuvenation Peel

Is an herbal, seaweed, essential oil, Beta Hydroxy Acid & Alpha Hydroxy Acid peel. The compound is a mixture of dried, crushed particles of whole plants and does not contain any synthetic chemicals or abrasives.

Salon strength, professional use Herb Rejuvenation Mask contains 54% Alpha & Beta Hydroxy Acid.

Rejuvenation Peel is devised to work as a deep botanical peel to achieve the maximum amount of skin exfoliation with very little discomfort.

Herb Rejuvenation Peel utilises Salicylic, Glycolic & Lactic acids. These are medium to high strength acids that are present in nature (honey, apples, fermented fruit & vinegar).

Herb Rejuvenation Peel diminishes the cohesion of epidermal corneocytes (cells in the stratum corneum, which is the outer skin layer), preventing thickening of the horny layer. In addition, Herb Rejuvenation Peel stimulates collagen, elastin & dermal glycol proteins. Herb Rejuvenation Mask's active ingredients slowly penetrate the skin with a mild burning sensation. A very weak erythema develops (redness of the skin), which diminishes within a few hours after treatment.

Frequently asked Questions

How long does it take to do the procedure?

The reason superficial peeling is called a "lunchtime peel" is because the procedure can be done in an hour or less. The client is able to leave immediately after treatment and resume normal daily activities with some restrictions such as avoiding exposure to strong sunlight. A series of peels at monthly intervals is usually required to attain the best skin rejuvenation result.

Do I need to prepare for a peel?

Ideally, the skin should be prepared for at least 1 week prior to the peel. Skin preparation should include the use of what has developed a pre lotion specifically to prepare the skin for a Preparation fluid (AHA 8%). This will leave the skin primed for penetration of the peel, accelerate the healing process and reduce the post-peel complications such as hyperpigmentation. Belle Natural Skincare peel,

Can Belle Natural Skincare Herb Rejuvenation Peel be used on all skin colours?

While all colours of skin are acceptable for the Peel, pale white to white skin is most likely to have the early photo damage best treated by the mask. Some darker skin may have a temporary loss of pigmentation after treatment.

What are the side effects of a peel?

Follow all post instructions given to you before and after your peel to minimize the side effects.

Am I suitable for a peel?

You are not suitable for a peel:

- If you are pregnant, have HIV/AIDS.
- If you are taking Roaccutane you must wait 6 months after the end of your therapy before you are suitable for a peel.
- If you have had facial surgery, you must wait 6 months before a peel is safe.
- If you have active cold sores, you should wait until they have healed.

What is Peeling?

Peeling is a procedure used for cosmetic improvement of skin. Agents are applied to the skin to remove skin cells at superficial, moderate, or deep layers so that new skin can grow and resurface the damaged areas.

How Will My New Skin Look? There is no redness in the resurfaced skin, the complexion is considerably improved, fresh, clear, and radiant.

"My skin is dramatically different & looks & feels 5 years younger. The pores are much finer & some of the fine lines have practically disappeared". "S"

 Belle Natural Skincare

NEW SKIN IN 10 DAYS!

The most unique aspect of **Herb Rejuvenation Peel** is not just its plant based formula, but rather the immediately visible results of the treatment. **Herb Rejuvenation Peel** can be repeated any number of times without harmful side effects. It can be used not only on the face but also on the back, stomach, upper arms and thighs.

After the treatment the skin is red and a burning sensation similar to mild sunburn can be experienced. No make up to be worn for a week after. SPF 30+ to be used.

This treatment is used to treat: enlarged pores, reduces fine lines and wrinkles, removes impurities, prematurely aging skin, scars, acne, Striae (stretch marks), diminished elasticity, hyper pigmentation, lip creases, dull & worn skin, light scars.

Herb Rejuvenation Peel's plant based formula, with its herbs, algae, minerals, enzymes and vitamins, is applied by specially trained professional beauticians. The micro-particles of the herbs gently smooth away the superficial layers of the skin. This stimulates the growth zone of the skin to produce new skin cells. The blood circulation of the skin is increased and the individual cells receive a surge of oxygen. A few days later the outer layers of the skin begin to peel. **Herb Rejuvenation Peel** offers you: Minimum discomfort and quick, visible results. Minimal interference with your social or business obligations. After Peel: For the Next Two-Day Period Do not put the face directly into a hot shower spray

- Do not use hot tubs, steam rooms or saunas
- Do not go swimming
- Do not participate in activities that would cause excessive perspiration (sweating)
- Do not exfoliate the treated skin.
- Stay Cool!!! Getting heated internally can cause hyper pigmentation (discoloration).
- Use SPF 30+

FIVE STEPS TO BEAUTIFUL SKIN

Day 1 - You have just had your **Herb Rejuvenation Peel**. At the moment your skin has reddened and you feel a light burning sensation, similar to slight sunburn. All very normal signs and symptoms. Your beautician will recommend the appropriate skincare products for your skin.

Day 2 - Now is the time to treat your skin with skin care products that are specially formulated for use after the **Herb Rejuvenation Peel**. These products contain valuable active ingredients that aid and enhance the results of the treatment.

Day 3 - Today you notice the first signs of skin peeling. It is important to continue using the specially formulated skincare products. These preparations have a well-balanced combination of active ingredients that give your temporarily dry skin the moisture and nourishment it needs.

Day 4 - The peeling of your skin is now very noticeable. Continue treating your skin with the skin care products recommended by your beautician during this time.

Day 5 - Your skin has now completely peeled. You have made an appointment with your beautician for the Collagen & Multi-Vitamin Salon treatment, where you're radiant, new skin will receive the valuable active ingredients it needs.

Your new skin! You've made it! Your skin glows with a new radiance. It is essential to continue to use our products for the next 7 days.

Before & After

Can Herb Rejuvenation Peel be used on all skin colours?

While all colours of skin are acceptable, it is pale white to white skin that is most likely to have the early photo damage and is best treated by the mask. Some darker skin may have a temporary loss of pigmentation after treatment.

What are the side effects of a peel? Follow all post instructions given to you before and after your peel to minimize the side effects.

Common side effects are: Skin redness, minor skin swelling, minor pain, redness and itchiness. Less common side effects include: infection, hyper pigmentation, cold sores, demarcation lines, acne. A very important post-procedure precaution is avoidance of sun exposure during healing. While you are wiping your skin with a warm cloth you can carefully slide the dead skin off. Try not to press and slide. Your skin may peel a few times and it's best not to press and pull to avoid discomfort. This symptom passes very quickly. After you bathe your skin in warm water you will be bright red! Basically your remaining old skin will be massaged away to reveal the new skin.

How much do peels cost? A tailored program will be designed for you at your consultation. This will be aimed at addressing your areas of concern and improving your skin's appearance and may incorporate other dermal services and specially selected cosmoceuticals.
